# Outline

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# Executive Summary

- Survey collected responses from over 90,000 developers worldwide
- Python and JavaScript are the most commonly used programming languages, while DevOps and Full-stack development are the most sought-after roles.
- Popular languages & technologies:
  - JavaScript, HTML/CSS, SQL, and Python
  - Web development, mobile development, and data analysis
  - Docker, Kubernetes, and React
- Increasing importance of open-source contributions and the influence of online communities in shaping developers' careers
- Diversity and inclusion remain ongoing challenges in the industry, with gender and racial disparities still prevalent

# Introduction

---

- The Stack Overflow survey is an annual survey conducted by Stack Overflow
- Provides a detailed analysis of the preferences, trends, and challenges faced by developers across different industries and regions
- One can gain a better understanding of the current state of the software development industry
- Survey data covers a wide range of topics
  - Programming languages ,frameworks
  - Job satisfaction, salary, education, etc.
- The 2019 Stack Overflow survey data helps to understand the trends and dynamics of the developer community

# Methodology

---

- **Survey:** Questions were structured to gather quantitative and qualitative data to provide comprehensive insights.
- **Data Collection:** 2019 Stack Overflow Developer Survey
- **Data Wrangling:** Remove duplicates, Data imputation, data normalization
- **EDA:** see data distribution, find outliers, median, correlation using *pandas*
- **Data Visualization:** Create different plots, charts in *Cognos, seaborn, matplotlib*
- **Dashboard:** *Using CDE, on following datasets*
  - *m5\_survey\_data\_demographics.csv*
  - *m5\_survey\_data\_technologies\_normalised.csv*

# Results

---

- Python is the most loved programming language
- JavaScript is the most used programming language
- Cloud computing is the most in-demand skill
- Machine learning is the most exciting technology
- The most popular IDE is Visual Studio
- The most popular programming language for web development is JavaScript
- The most popular programming language for mobile development is Java
- The most popular programming language for data science is Python

# Programming Language Trends

## Current Year

Top 10 Language used by Developers in 2019

No. of Developers

## Next Year

Top 10 Languages desired for the next year

No. of Developers

# Programming Language Trends - Findings & Implications

---

## Findings

- *JavaScript & HTML/CSS*:- most popular languages
- *Python, TypeScript, Go* gained interest
- *Bash/Shell, Java, PHP* lost interest

## Implications

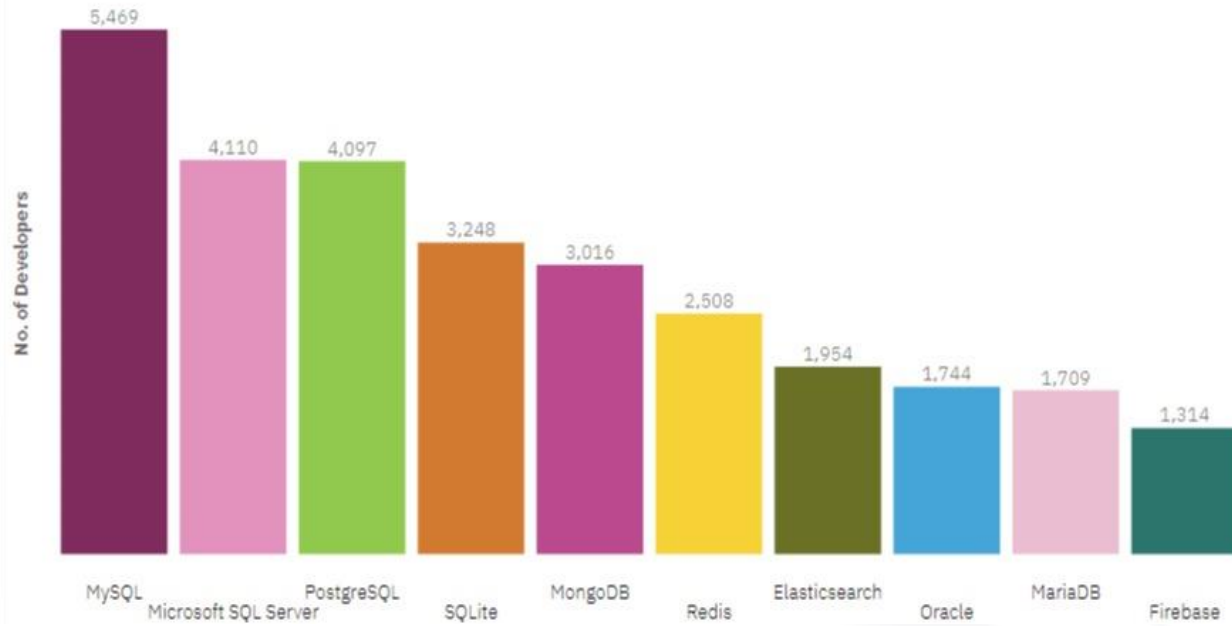

- Migration from *JavaScript* to *TypeScript*
- *Python* rising popularity show growth in data science, AI, ML
- *Python, Go, JavaScript* in high demand in near future

# DATABASE TRENDS

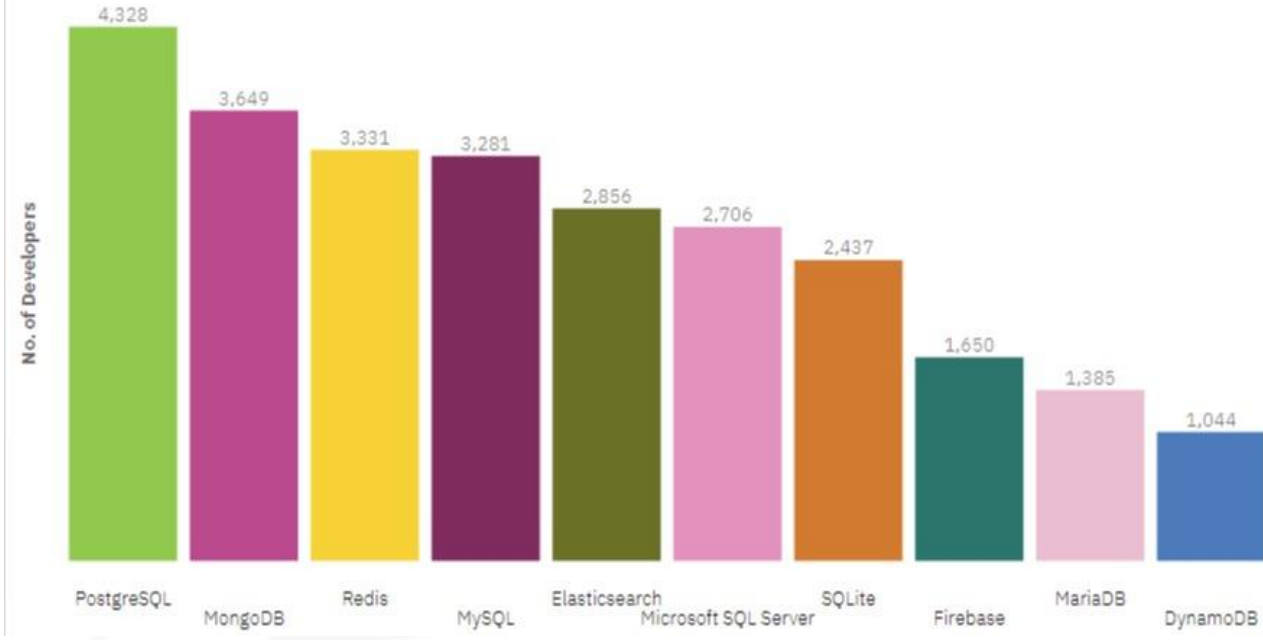

## Current Year

Top 10 Database used by Developers in 2019

## Next Year

Top 10 Databases desired for the next year

# Database Trends - Findings & Implications

---

## Findings

- MySQL most used in 2019
- *PostgreSQL, MongoDB* gained interest
- *MS SQL Server, SQLite, Oracle* losing demand

## Implications

- Increasing preference in *open-source databases*
- *NoSQL* gaining popularity

# Dashboard

---

Full, Interactive [Cognos Dashboard](#)

# Dashboard 1: Current Technology Use

Top 10 Language used by Developers in 2019

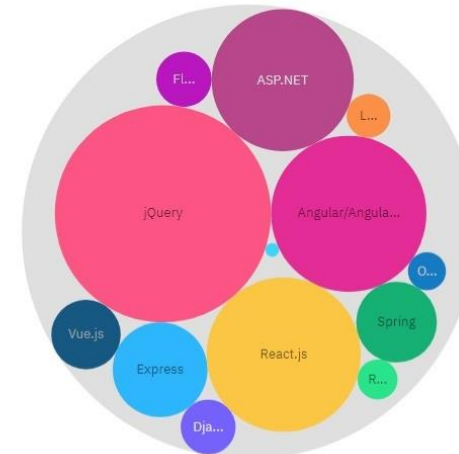

Top 10 Database used by Developers in 2019

Platform used by Developers in 2019

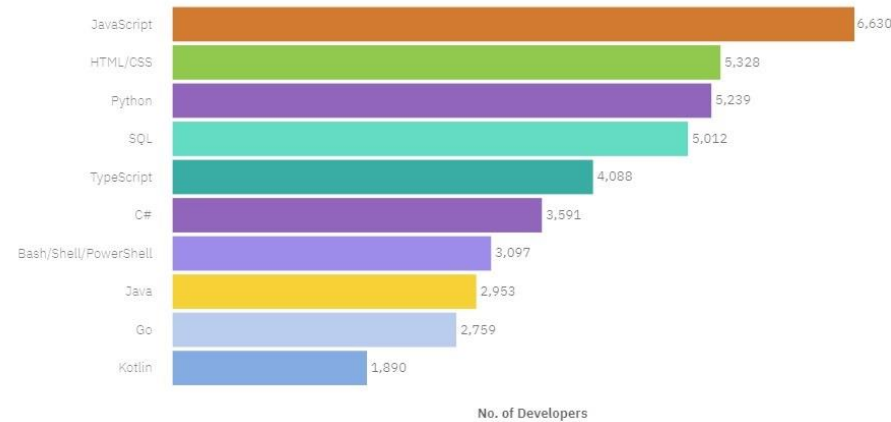

Top 10 Web Frame used by Developers in 2019

# Dashboard 2: Future Technology Trend

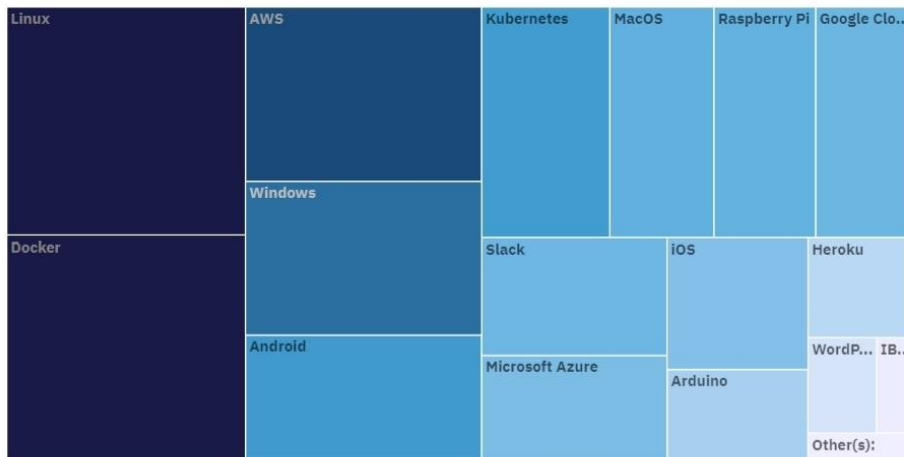

Top 10 Languages desired for the next year

Top 10 Databases desired for the next year

Platform desired for next year

Top 10 Web Frames desired for the next year

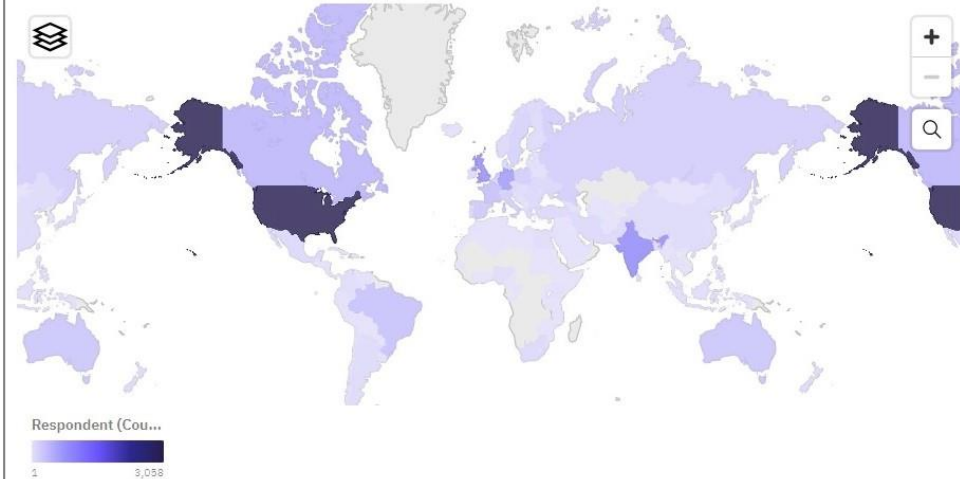

# Dashboard 3: Demographics

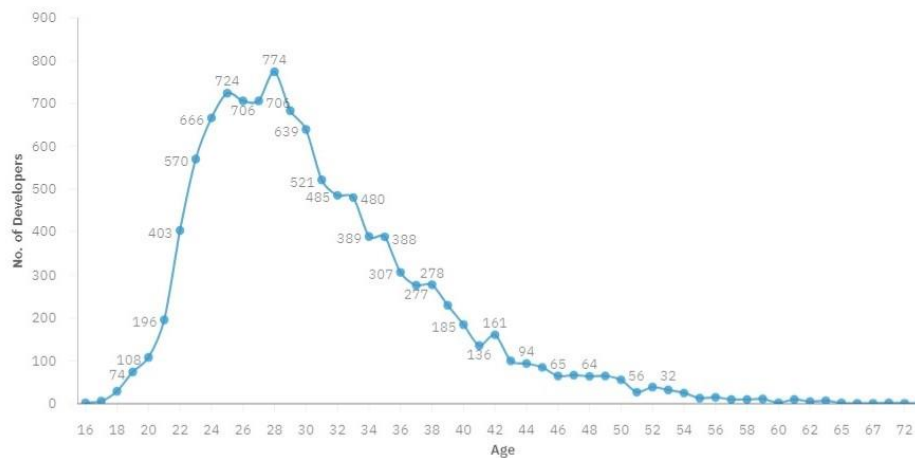

Developers % by Gender

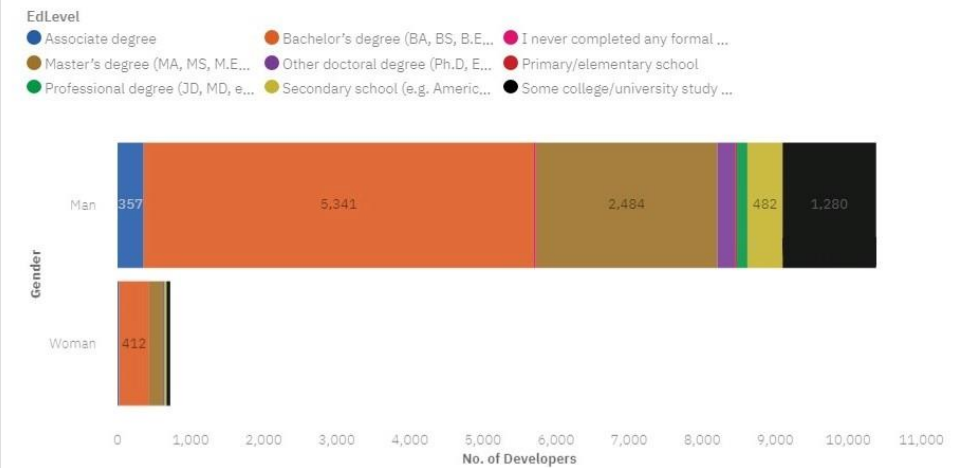

Developers count by Country

Developers by Age

Developers count by Gender & Education level

# Discussion

---

# Overall Findings & Implications

---

## Findings

- Programming Languages: Python & TypeScript gaining popularity
- Databases: NoSQL gaining interest
- Platforms: Windows losing interest, Linux & Docker gaining interest
- WebFrames: React.js is gaining interest
- Most developers are Bachelor's degree holders

## Implications

- NoSQL & Python will gain popularity as big data, AI, ML growing
- Young & without postgrads- major force
- Strong demand for developers in developed countries

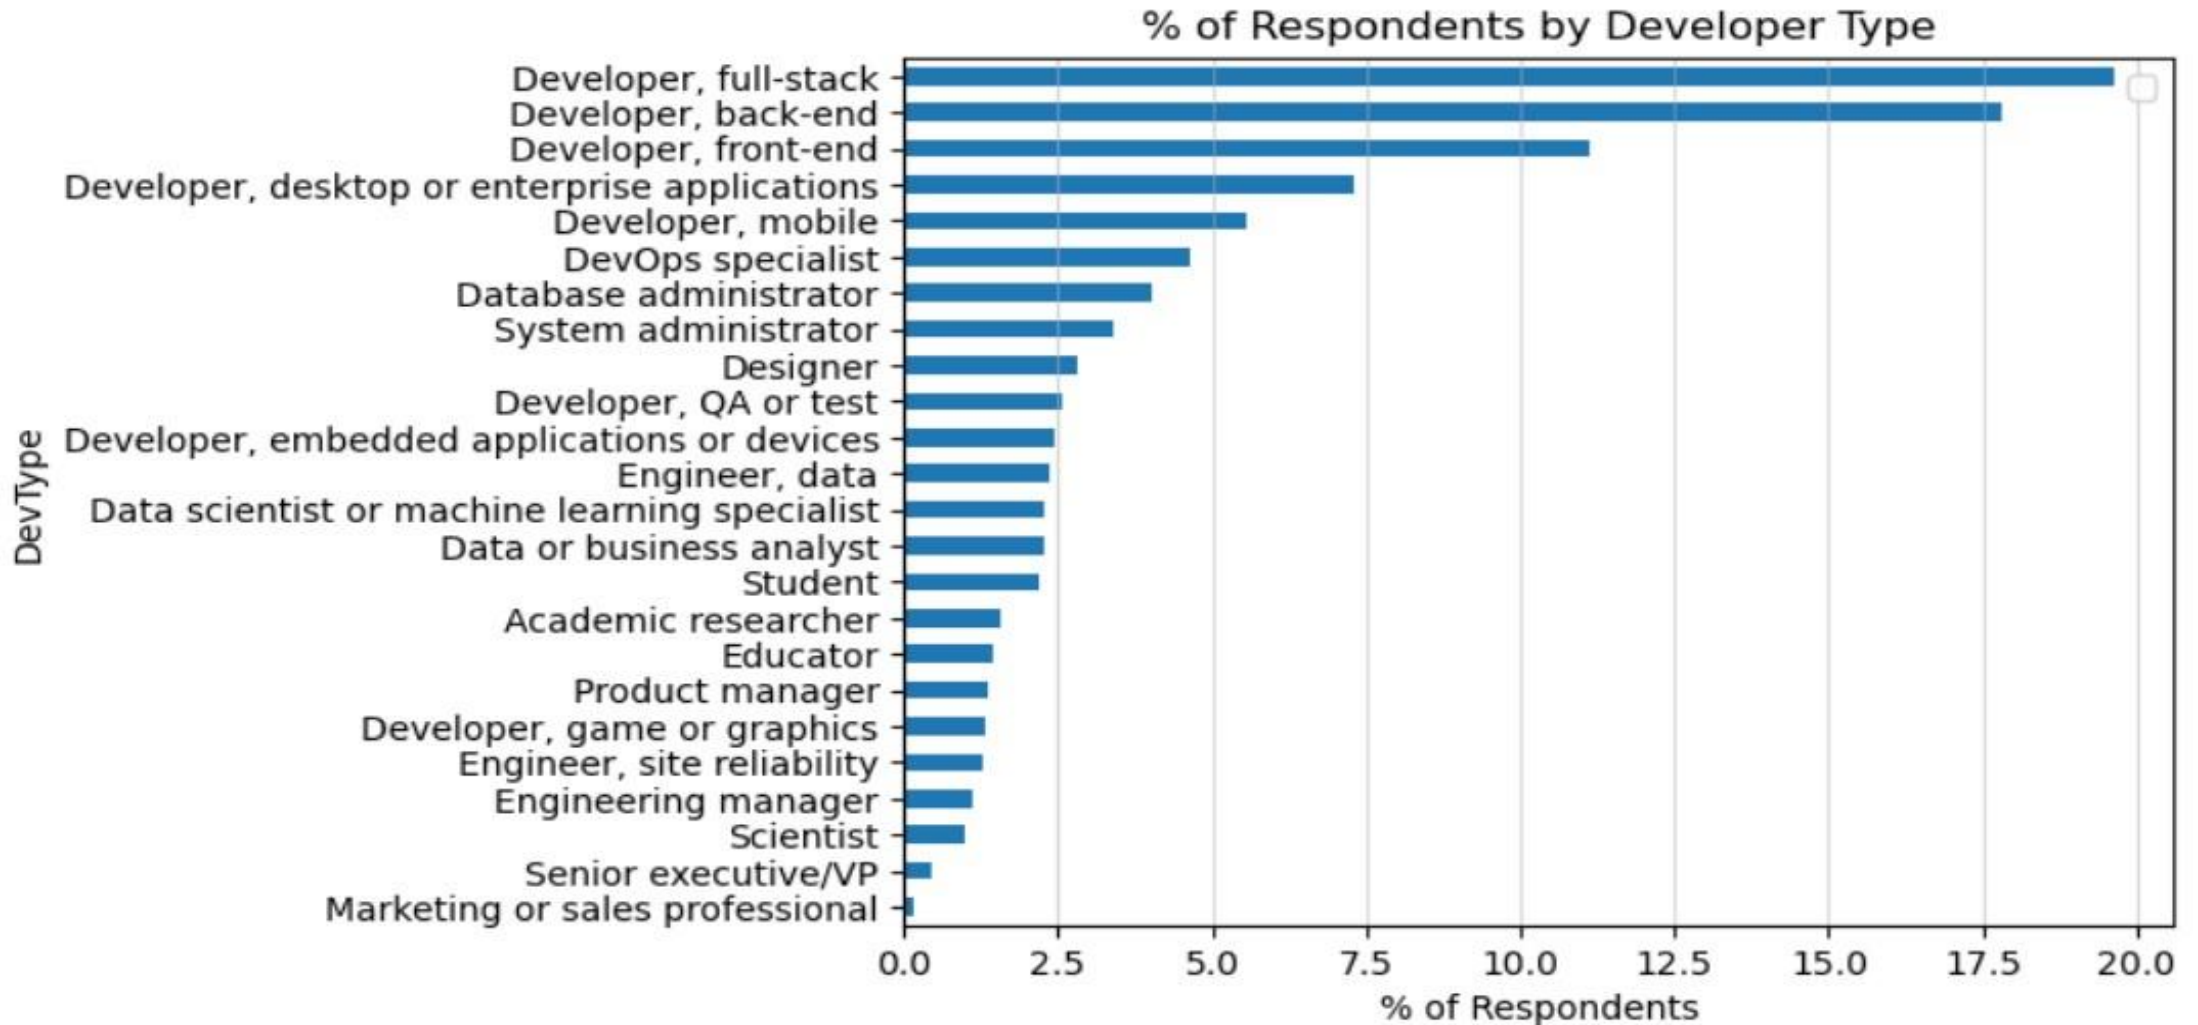

# Conclusion

---

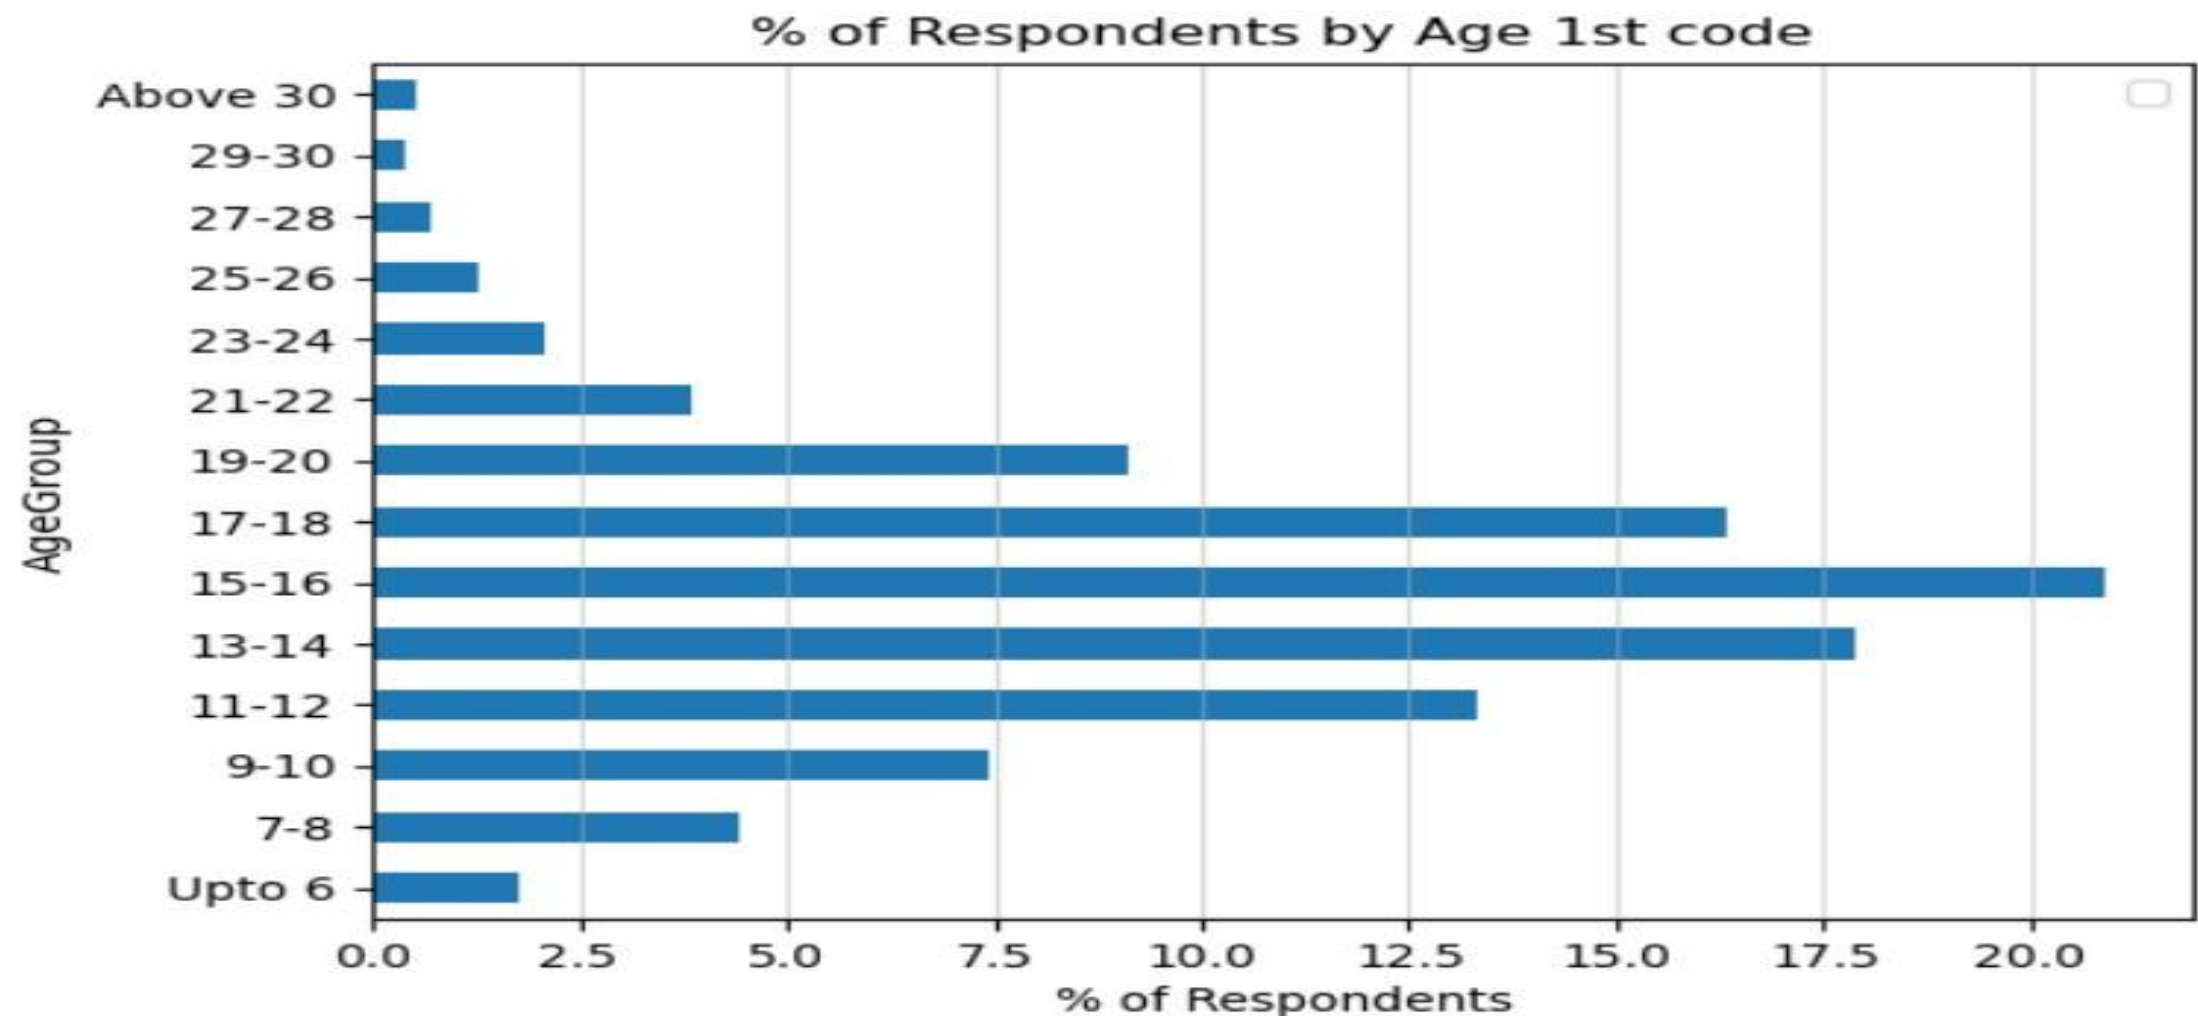

- Developers actively using and contributing to open-source technologies and platforms.
- Staying up-to-date with new technologies and expanding skills is crucial for professional success.
- Gender imbalance in the programming community, with a majority of respondents identifying as male.
- Developing countries may face challenges in getting jobs in the tech industry.
